

OSSI PROFESSIONAL SERVICES

Needs Analysis/Audit Services

A
world
of
data,
one solution.

*Consulting services to help
fulfill your future
enterprise data requirements.*

- NEEDS ANALYSIS
- CAPACITY PLANNING
- PROJECT DESIGN & ANALYSIS
- BACKUP/STORAGE AUDITS

The demand for data storage is increasing dramatically in every organization. Customers and users typically expect that every imaginable type of transaction record will be online, instantly available at any time for review and analysis. Keeping pace with these expectations is a difficult and never-ending job. The growth of new media formats incorporating sophisticated graphics, website content and even sound files and full-motion video compounds the challenge.

How can you be certain your enterprise storage facilities will continue to meet the demand, and that your storage strategy can adapt to continually enhance your competitive edge?

Clearly, this is an area where you can benefit from the assistance of experts. That's why you should call on the

consulting services of Open Systems Solutions, Inc. (OSSI), the data storage specialists.

Through our Needs Analysis/Audit Services, our experts will provide the skilled review and experienced assessments your enterprise storage planning demands. You can count on the professionals at OSSI to help you set your strategy to meet your storage needs now and long into the future.

OSSI
Open Systems Solutions, Inc.

OSSI Needs Analysis and Audit Services span project design and analysis, capacity planning and data backup/storage audits.

■ **NEEDS ANALYSIS**

OSSI storage professionals will examine your storage typology and analyze the current demand for enterprise data storage in your organization. Reports detail proposed solutions to improve your current situation while allowing for future growth. An account of anticipated ROI can also be included as part of our report when recommended storage projects are completed.

■ **CAPACITY PLANNING**

Forecasting future growth requirements is often an uncertain science. OSSI storage professionals bring many years of experience and in-depth knowledge of state of the art storage technology to the

task. We will help you evaluate your company's current and future storage needs. Tools used to assess capacity requirements include network and storage throughput testing and analysis of load requirements as they relate to your immediate and long-term business goals. Our storage professionals will help you identify the weak points and strengths of your current computing environment, and set the course toward the advanced data storage environment you desire.

■ **PROJECT DESIGN & ANALYSIS**

Complex data storage projects are our specialty. So when you set out to analyze and design new storage facilities for your enterprise, call us first. Our Professional Services experts will help you determine your project requirements and assist in distinguishing which hardware, software and services will be the best fit for your project needs, scope and budget.

■ **BACKUP/STORAGE AUDITS**

Rely on us to prepare your company for the worst. OSSI storage professionals have proven expertise in data backup and disaster recovery. Our Professional Services consultants have been helping large enterprises like yours secure their data for over twenty years. We will conduct thorough testing and system monitoring to assess your current facilities and procedures for data storage and disaster recovery. Our report will document the findings, offering an unbiased assessment of your current backup and recovery practices, giving you a clear action plan for remediation where required, as well as best practices recommendations to facilitate data backup and recovery systems.
